NEW PRODUCT

Press Release

Lean Table Light

Enamelling has long been used in product design as a method of applying a hardwearing and hygienic finish to metal such as cooking pots or street signs. Vitreous enamel has been applied to the Lean Table Light in the same manner. Particles of glass are sprayed on to cast iron, and then fired at high temperatures. The result is an indestructible, smooth and tactile finish with vibrant colour. Available in red the Lean Table Light is ideal as a table, desk or bedside table lamp.

Product information

Enamel Lean Table Light: Height 42cm, Diameter 13cm, Width 18cm

Prices available on request
