Press Release

Copper Shade

Copper Shade brings a sculptural sophistication to any interior, either alone or grouped as a dramatic chandelier cluster. The pure copper used is a vacuum metalised film, only microns thick, on the interior of a polycarbonate sphere, creating an enriched and softened light source.

Copper Collection

With its historical position as the first metal worked by man, copper has a crucial role in high technology industries and innovation with

applications from solar cells to microwave radiation. The Copper collection highlights the dynamic and flexible properties of using copper. Also in the collection is Fat Spot, an alternative to the numerous minimal architectural spotlights on the market.

Product information and prices

Copper Shade, Diameter: 45cm globe

£190 / €272/\$498
