Press Release

NEW PRODUCT

Tom Dixon.

Bell

An exercise in reductionism – Bell is a dome suspended over a dome.

The hyper-polished, mirrored and reflective surface allows Bell to take on the colours and characteristics of its surrounding area – our continued exploration into the super-shiny.

Formed of chrome plated steel, the same material used on vintage car bumpers, each dome is pressed into shape giving it its sleek, curved shape.

When switched on, a halo of light is reflected onto the lower dome – a direct stream from the frosted-glass underside of the dome above.

Available in a Floor and Table version.

Product Information and Prices:

Bell Table Light: £420

Table Light features a dimmer switch on light base

Bell Floor Light: £845
